

From Jersey for Jersey:

Medicann in association with the European Cannabis Innovator KHIRON Europe are proud to launch the first ever Jersey-grown medicinal cannabis product

In this ground breaking collaboration with KHIRON Europe, Medicann the award-winning Medicinal Cannabis Clinic, are the first to offer KHIRON's brand-new Jersey-grown medicinal cannabis product. This product is now available to any prescriber that is on the Jersey medical practitioners register via Delta 9 pharmacy.

'Green Knight', is the first ever medicinal cannabis flower to be approved for sale that is grown in Jersey under strict GMP compliant conditions; and is setting a new standard for purity, potency, and patient care.

Rooted in the island's rich heritage of cultivating premium organic goods, this revolutionary addition to the market is poised to redefine the medical cannabis experience for patients, in Jersey, across the Channel Islands, the UK and beyond.

Medicann CEO, Gary Whipp commented:

“We are delighted to be the first clinic in the Channel Islands to launch the only UK grown medicinal cannabis product. Cultivation has always been a part of Island life, and being able to offer a locally grown high quality product to patients is not only a great move for our local economy, but also means that at Medicann, our consultants have even greater choice of medication to help patients manage their conditions”.

Franziska Katterbach, President of KHIRON Europe adds:

“We are pleased to offer with KHIRON GK 24/1 for the first time a Jersey-grown cannabis product for the medical cannabis market in Jersey. KHIRON GK 24/1 is the first product on the market to be manufactured so close to the mainland UK. Until now, all cannabinoid-based therapy options available have been imported from producers overseas, leading to calls for the development of a robust domestic supply chain. We are convinced that having a medicine that has been produced domestically in the UK will be another step towards our ultimate goal: wider NHS access.”

The special features of this new therapy option are:

- a. **Non-Irradiated and Greenhouse Grown:** Quality and safety are paramount, and this product reflects our ability to produce the highest quality products under strict GMP conditions.
- b. **First Jersey-Grown Product for the UK:** Proudly the first Jersey-Grown flower, it symbolises our commitment to providing the highest quality product with sustainable practices by engaging with our UK community.
- c. **Unique Genetics:** A carefully crafted combination of traditional and conventional cultivars sets this product apart.
- d. **Exclusively for UK Patients:** This is the first product of its kind, designed and developed in Jersey for our UK patients.
- e. **Reliable Stock Control:** This product will offer a reliable stock level for patients requiring long term therapeutic treatment options.
- f. **Environmental footprints:** The first time the UK has had a medical cannabis product on its doorstep with local transportation minimizing environmental impact.

Green Knight by KHIRON is available now - visit www.medicann.co.uk to become a patient, or if you are already a patient, ask your consultant on your next visit if this medication may help your condition.

Medicann is a member of trade bodies: The National Cannabis Industry Association, the Cannabis Trades Association and the Cannabis Industry Council.

Medicann can be found at www.medicann.co.uk and on social media platforms including X, Instagram and Facebook

About KHIRON Europe in the UK:

KHIRON embarked on its journey in the UK in 2019 as a founding member of Project T21, the largest Medical Cannabis observational study in the UK. This initiative aims to overcome access barriers in the UK market with an independent data collection.

In 2021 KHIRON opened ZERENIA Clinics UK as a specialist care provision for mental health, pain and neurological conditions. With a 97% of patients reporting an improved quality of life post-treatment at ZERENIA Clinics UK, this specialist clinic has set an industry benchmark in the UK. The clinic has set a precedence for ensuring patients are treated with their health outcomes and holistic care at the forefront of this model of achieving clinical excellence. Using scientific RWD and evidence-based practice medical cannabis prescribing at ZERENIA Clinics UK leads the way in this emerging medical field.

This is evidenced by the fact that KHIRON is the only company that has secured reimbursement from the National Health Service (NHS) in 2023 for two patients.
